2. The following daily coal consumption quotas for locomotives were fixed on 4 May 1953:

<u>Railroad District</u>	<u>Amount of Coal (in tons)</u>
Berlin	2,530
Greifswald	910
Schwerin	1,100
Magdeburg	2,200
Halle	3,580
Erfurt	2,930
Dresden	3,100
Cottbus	1,350

25X1A Total 17,700 tons <sup>2</sup>

25X1A Comment. As compared with the last reported status of 8 April, total coal stocks decreased by 15,943 tons to a total of 173,742 tons. However, the figures mentioned indicate that only stocks of brown coal briquettes decreased, while hard coal stocks increased by 9,000 tons. According to the daily coal consumption quota of 17,700 tons fixed on 4 May, coal stocks available were adequate for 9.8 days' requirements. The backlog of loaded cars was normal. The park of damaged cars shows a declining tendency, and the park of operational cars is increasing.

25X1 Comment. The daily coal consumption quota was reduced from 19,300 tons in April to 17,700 tons in May, probably due to seasonal conditions.
